23 July 1982

MEMORANDUM FOR: Users Of Ops Manual ANNOTATE, OLAY8, OLAY9, PLOT
FROM :
OSG/CSD
SUBJECT : PLOT Tape DATCHK Error Messages
REFERENCES : DR/AR 0895

STAT

The 1100/80 EXEC System executes a label check whenever an attempt is made to either read or write a 7-track plot tape. The unique format of the CAL-COMP plotter commands precludes the writing of a tape label by the applications program. Even though a tape label is not required, the tape label check is performed.

The following is an example of the console messages and responses required whenever a new or freshly degaussed tape is used:

O TB11 PO/I1/I1CMO/TCBO DATCHK R EXEC 8 AGM
O G
O IS TAPE ON TB11 A LABELED TAPE Y,N
O N

After a plot tape has been used, and if it has not been degaussed, the DATCHK and LABELED tape messages will sometimes not appear.

Under current operating conditions, the data and label checks are acceptable. The data written to the plot tapes is not in any way impaired. This situation will exist until further notice.

Change Description

1) ANNOTATE: Tape assignment card in the run deck was changed
From: @ASG,TM TAPE1.,U,PLOTTTP To: @ASG,TMJ TAPE1.,U,PLOTTTP

2) OLAY8 runstreams XM8*W\$RUN.OLAY8/XQT
OLAY9 XM9*W\$RUN.OLAY9/XQT were changed
From: @ASG,T PLOT-TAPE.,U/////6,PLOTTTP
To : @ASG,TJ PLOT-TAPE.,U/////6,PLOTTTP

3) PLOT: source code in XM8*W\$SYM.PCHOIS, tape assignment code changed
From: @ASG,TM TAPE1.,30 To: @ASG,TMJ TAPE1.,30

Implementation/ Verification Instructions

1) ANNOTATE: Notify OSG/RSD/MAP of change. Use her card deck to initiate run. Verify tape request message on operator's console. STAT

2) OLAYS Copy XM8*W\$RUN.OLAY8/XQT to: XM8*PSRUN.OLAY8/XQT
OLAY9 XM9*W\$RUN.OLAY9/XQT XM9*PSRUN.OLAY9/XQT

3) PLOT: Copy XMS*W\$SYM.PCHOIS to XMS*P\$SYM.PCHOIS
Compile using: XMS*PSRUN.PCHOIS/COMP
Map using : XMS*PSRUN.PCHOIS/MAP
TipCopy using: XMS*PSRUN.PCHOIS/TIP
